What You Are Not Being Told (This is Just the “Tip of the Iceberg”)

## Introduction

I created this brief document to provide some resources that will hopefully allow people to see the greater agenda that is (and has been) afoot for quite some time now. As the title suggests, the information here is only the “tip of the iceberg”. There is a whole lot more that is going on in the shadows.

This information is not fully discussed (or discussed at all) by the “corporament”.

In the USA, the “corporament” exists as the:

military (defense/offense) + industrial + academic (schooling — at all levels — as prison) + “corporament” entertainment (Hollywood, media, advertising/consumerism/commercialization, propaganda/psychological warfare) + judicial (defense and prosecutorial lawyers, judges, law enforcement/police, prisons) + financial (banks, accounting firms) + religion + petrochemical/pharmaceutical (drugs, antibiotics, antibacterials, vaccines, pesticides — toxins to kill or put you at “dis-ease” and drugs to “treat” you) + imperial commu-soci-capitofasdmorepubcracism system/society/economy/Western thinking = Military-industrial-academic-“corporament” entertainment-judicial-financial-religion-petrochemical/pharmaceutical complex.

Commu-soci-capitofasdemorepubcracism is derived from communism, socialism, capitalism, fascism, democracy, and republic as these concepts all have the same root. The complex was originally defined in the aforementioned article [[https://www.utdailybeacon.com/opinion/our-government-can-not-be-trusted/article\\_81932d59-0861-5647-87b2-901d4d5cabd8.html](https://www.utdailybeacon.com/opinion/our-government-can-not-be-trusted/article_81932d59-0861-5647-87b2-901d4d5cabd8.html) | Our government can not be trusted by Irucka Ajani Embry, Monday, 26 August 2002, *The Daily Beacon*. Also, the article can be found by searching at <https://www.questionuniverse.com/oldway/columns.html>.], but it has been recently revised to reflect a new understanding of the complex's nature.

–Irucka Ajani Embry, piece entitled: “Attack of the ...”, pages 103-104, from *Balancing the Rift: ReCONNECTualizing the Pasenture*, ISBN-13: 978-0-9914994-0-3 / ISBN-10: 0-9914994-0-9

Also, I am enclosing resources that will enable us, globally, to unite together as Human Beings, the Human Race, and regain our freedom & power from the global *elites* that think that they control us because we have allowed them to develop that false conclusion.

It's past time for the Human Race To Get Off Our Knees [see *Human Race Get Off Your Knees: The Lion Sleeps No More* By David Icke — <https://shop.davidicke.com> }

We are All Infinite Love/Infinite Consciousness having an Experience as ... [see *Remember Who You Are: Remember 'Where' You Are and Where You 'Come' from: Remember ...* By David Icke — <https://shop.davidicke.com> }

Thank you.

## Useful Quote About the PCR Tests

- “Test performance can be affected because the epidemiology and clinical spectrum of infection caused by 2019-nCoV is not fully known. For example, clinicians and laboratories may not know the optimum types of specimens to collect, and, during the course of infection, when these specimens are most likely to contain levels of viral RNA that can be readily detected.
- “Detection of viral RNA may not indicate the presence of infectious virus or that 2019-nCoV is the causative agent for clinical symptoms.
- “The performance of this test has not been established for monitoring treatment of 2019-nCoV infection.
- “The performance of this test has not been established for screening of blood or blood products for the presence of 2019-nCoV.
- “This test cannot rule out diseases caused by other bacterial or viral pathogens.

“The analytical sensitivity of the rRT-PCR assays contained in the CDC 2019 Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel were determined in Limit of Detection studies. **Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted**, assays designed for detection of the 2019-nCoV RNA were tested with

characterized stocks of in vitro transcribed full length RNA (N gene; GenBank accession: MN908947.2) of known titer (RNA copies/μL) spiked into a diluent consisting of a suspension of human A549 cells and viral transport medium (VTM) to mimic clinical specimen. Samples were extracted using the QIAGEN EZ1 Advanced XL instrument and EZ1 DSP Virus Kit (Cat# 62724) and manually with the QIAGEN DSP Viral RNA Mini Kit (Cat# 61904). Real-Time RT-PCR assays were performed using the Thermo Fisher Scientific TaqPath™ 1-Step RT-qPCR Master Mix, CG (Cat# A15299) on the Applied Biosystems™ 7500 Fast Dx Real-Time PCR Instrument according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel instructions for use. [my emphasis]

“In response to strong demand for higher throughput testing approaches as well as a global shortage of nucleic acid extraction reagents causing significant delays in testing, the CDC has evaluated specimen pooling and determined that pooling of up to 4 specimens is suitable for use with the 2019-nCoV Real-Time RT-PCR Diagnostic Panel.

“Specimen pooling may cause a slight reduction in test sensitivity and therefore may be most appropriate for screening or diagnostic testing when laboratory staff, equipment or reagents are insufficient to accommodate testing demand. Specimen pooling only presents a throughput advantage when the disease prevalence is low. Therefore, laboratories should monitor specimen positivity rates over time to determine if pooling of specimens continues to provide a test throughput advantage over individual specimen testing.

“While this procedure describes the process to prepare, process and test a pool size of up to 4 specimens, specimen pool sizes from 2-4 are authorized for use with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. When using a pool size of less than 4 specimens, please use the following instructions as a model. Pooled specimen input volume and the pooled specimen to lysis buffer volume ratios must remain as prescribed below (not a lower proportion of lysis buffer) to ensure inactivation of SARS-CoV-2 in patient specimens. An N-pool specimen approach should include equal volumes of each of the N specimens pooled together to create the total pooled specimen input volume required under the below pooled specimen extraction instructions.”

–CDC 2019–Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel For Emergency Use Only Instructions for Use Catalog # 2019-nCoV EUA-01 1000 reactions For In-vitro Diagnostic (IVD) Use Rx Only, Effective 07/21/2021; pages 38, 40, and 58; <https://www.fda.gov/media/134922/download>

## Useful Quote About the HIV Antibodies

“I did computer searches. Neither Montagnier, Gallo, nor anyone else had published papers describing experiments which led to the conclusion that H.I.V. probably caused AIDS. I read the papers in Science for which they had become well known as AIDS doctors, but all they had said there was that they had found evidence of a past infection by something which was probably H.I.V. in some AIDS patients. They found antibodies. Antibodies to viruses had always been considered evidence of past disease, not present disease. Antibodies signaled that the virus had been defeated. The patient had saved himself. There was no indication in these papers that this virus caused a disease. They didn’t show that everybody with the antibodies had the disease. **In fact they found some healthy people with antibodies.**” [my emphasis]

–Kary Mullis, *The Medical Establishment vs. The Truth* Book Excerpt, *Penthouse* Sept. 1998 [<https://virusmyth.com/aids/hiv/kmdancing.htm>]

## 2013 E-mail to Tommy and Trisha Morrison from Kary Mullis

“Dear Tommy (and Trisha),

“A number of diseases are detected by the fact that using two sequences known to be contained in the DNA/RNA of some organism and running a PCR reaction, containing that DNA, a fragment of a known size predictable from the sequence of that organism will be produced. Further evidence (and much more credible) for the presence of that particular organism can be obtained by sequencing the fragment so obtained. An intermediate level of confidence can be obtained by so-called hybridization of the obtained fragment with a known sequence standard.

“Most diseases can be diagnosed with some independent measure not related to DNA, but over the years DNA evidence has become a well-trusted method, and the mere presence of HIV DNA sequences in your blood is sufficient cause for most physicians to pronounce that you have AIDS and treat you for it. (You can have your prostate gland surgically removed based on higher than expected levels of prostate hormone, but I wouldn’t recommend it without collaborative evidence of rampant prostate cancer.)

“The issue of assigning meaning to the evidence of HIV sequences in people is in my opinion the real outstanding issue, and my opinion is that there is insufficient evidence to conclude that such sequences are dangerous enough to the person (if at all) to justify a treatment that may very well be.

“I have made myself clear on this issue for years. If I were to discover something which would make me think otherwise, I would feel honor-bound to make that very public.

“Sadly anybody who can read and really wants to know about the issue of AIDS can read about it forever and still not know much about it as it is a highly contested issue and the financial consequences are immense. There are a large number of such issues in the world. Welcome to Earth.

“PCR detects a very small segment of the nucleic acid which is part of the virus itself. The specific fragment detected is determined by the somewhat arbitrary choice of DNA primers used which become the ends of the amplified fragment (not virus isolation). They have to be in the sequence for it to be amplified in the first place, but they can be rather a small part of the total sequence. (Two to three hundred nucleotides is usually chosen out of several thousand in the total retrovirus). When incorporated in a cell the virus exists as DNA, when it is released from the cell in its infectious form it is RNA; which can be converted easily into DNA in the cell or in vitro for purposes of amplification. There are many sequence variations among the sequences called HIV. Any one of them can get you classed as what they consider HIV positive. And due to the tiny amounts of nucleic acid detectable after many cycles of PCR amplification (after 30 cycles one copy will get you about a billion copies) the test is super sensitive. Antibodies are detected by a non-PCR test called an Elisa. Elisa testing is not so specific as PCR as there are many antibodies not specific to HIV which may cross-react in this test. If a sequence amplifies with primers designed to HIV, it is HIV by definition. In order to amplify and produce a fragment of approximately the correct size the original sequence must hybridize with the primers, and therefore it must be at least a very close match (at least at the primer sites) to what has been defined as HIV. (now called HIV-AIDS in case there are any skeptics).”

–Kary Mullis, Date: Tue, May 7, 2013 4:44 pm, [http://fourwinds10.com/siterun\\_data/health/disease/news.php?q=1385227884](http://fourwinds10.com/siterun_data/health/disease/news.php?q=1385227884)

## Troubling Questions About the Scientific Validity of the Test\$

- 1) Was the PCR (polymerase chain reaction) test created to diagnose “dis-ease”? If not, then why is it being used to attempt to diagnose “dis-ease”?
- 2) Has any “health” authority in the world been successful at isolating the “SARS-CoV-2 virus” (“coronavirus”) from “patient-zero” in Wuhan, China? If not, then why not? [1]
- 3) Has that isolated “virus” been used in the production of all of the “COVID-19” “dis-ease”-confirming tests? If not, then why not? If not, then what genetic material, if any, is being used in the test kits? [2]
- 4) If the SARS-CoV-2 “virus” has yet to be properly isolated, what genetic material is being used in the (RT)-PCR tests & the antibody tests {a protein is created in a response to what genetic material}?
- 5) Which primer(s) are being used with the specific (RT)-PCR test that was used on you?
- 6) How many cycles were used in the specific (RT)-PCR test that was used on you?
- 7) What does a positive and/or negative (RT)-PCR test actually mean since there is no isolated and then purified SARS-CoV-2 “virus” to detect in you?
- 8) Which antibodies are to be identified with the specific antibody test that was used on you?
- 9) What does a positive and/or negative antibody test actually mean since the whole idea of antibodies is derived from the fraudulent “germ theory of disease causation”? [3]
- 10) Are the test\$ a back-door method of vaccinating unsuspecting people? If so, is that ethical? If so, is that legal? If so, then who is legally liable for any adverse reactions from this method of vaccination? [4]
- 11) Who is legally liable for any adverse reactions from any of the tests?
- 12) Who is legally liable for our DNA after it is processed & possibly sold to third-parties?
- 13) Why is the DNA of all Human Beings & all other Biological Life wanted? What is the ultimate end game of having everyone’s genetic material?
- 14) Why was a sample of the following items positively confirmed as “COVID-19” positive via the PCR test for the not-ever isolated nor purified “SARS-CoV-2 virus” (“coronavirus”): a) a goat, b) a papaya, c) a quail, and d) a can of Coca-Cola? [5]
- 15) How much money has been made by supplying the world with fraudulent test\$ (there is not “virus” to detect) that have occult agendas? [6]
- 16) Why aren’t more people all around the world asking these & other questions?
